SUBJECT: Corrective Action Plan (CAP)-Part B - No Further Action Required

GA

Facility ID:

Dear Ms.

The Georgia Underground Storage Tank Management Program (USTMP) has received correspondence from _____ and Matrix Engineering, dated December 2, 2010, that forwarded properly certified Monitoring Reports.

Based on current requirements of the Georgia Underground Storage Tank Act, the Georgia Rules for Underground Storage Tank Management (GUST Rules) and the data submitted, the USTMP has determined that **no further action is required for the referenced release.**

However, further corrective action may be required if mandated through more stringent State or Federal statutory or regulatory changes. Additional measures may also be required if existing or future drinking water systems or surface water bodies within two miles of the site are impacted by any dissolved contamination resulting from this release, or if previously unidentified soil contamination, dissolved contamination or free product are identified as originating from this site.

The incurred expenses outlined on your Cost Review Forms (CRFs) appear reasonable and appropriate to the Tasks described in the reports. This determination is based on comparison to similar corrective action at other UST facilities.

Please submit a Completion Report and Certification, documenting that the associated monitoring wells have been properly abandoned, by **March 21, 2011**. No later than thirty (30) days after submission of the Completion Report, please submit your final claim for reimbursement from the GUST Trust Fund.
